IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with strikethrough.

Please REPLACE the paragraph beginning at page 3, line 16, with the following paragraph:

[0029] The present invention is directed to a user interface, particularly, a graphical user interface (GUI) in the form of a tracking menu, pan-zoom tool 10, as depicted in figures 1a and 1b and is particularly suitable for a pen or stylus based computer system, such as a tablet PC. Figure 1a shows a tracking symbol or cursor 12 hovering over a pan region 14 (pan is "highlighted") and figure 1b shows the cursor 12 hovering over a zoom region 16 (zoom is "highlighted"). As depicted, the tool includes two semi-transparent regions 14 and 16 where panning is placed in an outer ring and zooming is placed in an inner region. The outer ring 14 can include a hand icon 18 conventionally representative of a pan operation and the inner region 16 can include a magnifying glass icon [[20]]19 representative of a zoom operation.

Please REPLACE the paragraph beginning at page 4, line 27, with the following paragraph:

[0033]   The pan-zoom tracking menu 10, as noted above, includes a tracking menu tracking boundary 20 depicted by a dashed line in figure 2. This boundary 20 allows the pen cursor 12 to move within the tracking menu 10 without causing the tool 10 to move with the movement of the pen. The boundary 20 is shown as coinciding with the visible edge of the exterior of the pan graphic 14 but need not be so coincident. Figure 2 also shows another embodiment of the graphic for the tool 10 where the icons 18 and [[20]]19 have been replaced by words and in the case of figure 2 the pan region is highlighted.
